

June 30, 2011

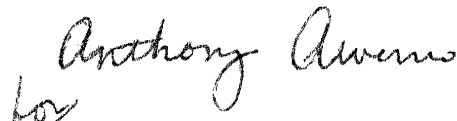

Hon. Shoshana M. Grove
Secretary
Postal Regulatory Commission
901 New York Avenue NW, Suite 200
Washington, DC 20268-0001

Dear Ms. Grove:

This transmits the enclosed copy of the Postal Service's progress report regarding the participation rates, compliance, and data yield of bulk First-Class Mail and Standard Mail customers using Full-Service Intelligent Mail. This responds to the requirement in the Commission's FY2010 Annual Compliance Determination Report that the Postal Service furnish monthly reports of such information.

Thank you for your consideration of this matter.

Sincerely,

for
Kevin A. Calamoneri

Corporate & Postal Business Law

Enclosure

**Monthly Progress Report on Full-Service Intelligent Mail Participation and Compliance by Commercial First-Class Mail and Standard Mail Customers
(June 30, 2011)**

The Postal Service previously updated the Commission on the progress of Full-Service Intelligent Mail participation and certification on May 27, 2011.

Between April 1 and June 17, the Postal Service measured over 796 million First-Class Mail items from 118 active certified Full Service Intelligent Mail customers. Measured First-Class Mail items with an overnight service standard originated in 62 districts, those with a two-day service standard originated in 57 districts, and those with a three-to-five day service standard originated in 52 districts. For Standard Mail, there were more than 402 million items, with origin data on Destination-Entry letters and flats for all 67 districts between April 1 and June 10.

The Postal Service is on target to report Quarter 3 Standard Mail and First-Class Mail performance to the extent indicated in its filings in Docket No. RM2011-7. As reported previously, the Postal Service is actively working towards implementing national Critical Acceptance Times and Critical Entry Times. Based on these pending changes, Full-Service Intelligent Mail certification is no longer necessary, and the Postal Service has suspended the mailer certification process. With the changes, the Postal Service currently anticipates measuring over 1.2 billion Full-Service Intelligent Mail pieces per month in Quarter 4.
